

## Features and natural classes (*Tiêu chí khu biệt và phân loại tự nhiên*)

Cơ sở âm vị học và ngữ âm học

Lecture 7

## Generalizing phonological rules

---

- In English, /t/ has (at least) two allophones:
  1. [t<sup>h</sup>] occurs at the beginning of words
  2. [t] occurs after [s]

## Generalizing phonological rules

---

- But **exactly the same pattern** occurs with /p/ and /k/:

[k <sup>h</sup> ɒt]	cot	[skɒt]	scot
[p <sup>h</sup> ɒt]	pot	[spɒt]	spot

## Common features

---

What do the phonemes /p/, /t/, and /k/ all have in common?

## Common features

---

What do the phonemes /p/, /t/, and /k/ all have in common?

They are all **voiceless stops**

## Natural classes (*phân loại tự nhiên*)

---

What do the phonemes /p/, /t/, and /k/ all have in common?

They are all **voiceless stops**

- /p/ /t/ /k/ form a **natural class** of voiceless stops (*một phân loại tự nhiên*).
- We can describe the general pattern by appealing to this natural class as opposed to having to write three rules for the three different stops.

## Natural classes (*phân loại tự nhiên*)

---

Rules act not on arbitrary sets of sounds, but on **systematic classes** of sounds.

- It's not surprising that /p t k/ vary in similar ways...
- ...but it would be surprising if /s w ʎ d/ did.
- These systematic, or **natural**, classes can be defined in terms of **phonetic features**.

## Another example

---

- In Vietnamese, there are two rules that apply after rounded vowels: /k/ > [k̚] and /ŋ/ > [ŋ̚].

/ɔk/ > [ɔk̚]	óc	/oŋ/ > [oŋ̚]	ông
/uk/ > [uk̚]	úc	/uŋ/ > [uŋ̚]	ung

## Another example

---

- In Vietnamese, there are two rules that apply after rounded vowels: /k/ > [k̚] and /ŋ/ > [ŋ̚].

/ɔk/ > [ɔk̚]	óc	/oŋ/ > [oŋ̚]	ông
/uk/ > [uk̚]	úc	/uŋ/ > [uŋ̚]	ung

What do the sounds /k/ and /ŋ/ have in common?

## Another example

---

- In Vietnamese, there are two rules that apply after rounded vowels: /k/ > [k̚] and /ŋ/ > [ŋ̚].

/ɔk/ > [ɔk̚]	óc	/oŋ/ > [oŋ̚]	ông
/uk/ > [uk̚]	úc	/uŋ/ > [uŋ̚]	ung

They are both of the **velar stops** that occur in Vietnamese.

## Distinctive features (*tiêu chí khu biệt*)

---

- We use distinctive features to characterise segments in terms of **natural classes** (*phân loại tự nhiên*)
- Features help us write **short, simple** phonological rules
- Features are usually defined in **phonetic** terms.

## Feature values

---

- Most features are **binary** (+/−, *lưỡng phân*)
- e.g. [±voice] [±sonorant], [±consonantal]
- This implies that there are natural classes of e.g. both [+voice] segments and [-voice] segments.

## Major class features

### [±consonantal]

Segments which have a narrow constriction somewhere along the centre of the vocal tract.

[+cons]	[-cons]
stops	vowels
fricatives	glides
affricates	[h, ɦ, ʔ]
nasals	
laterals	
trills	

For [h, ɦ, ʔ] the constriction is in the larynx.

## Major class features

### [±consonantal]

Segments which have a narrow constriction (thắt) somewhere along the centre of the vocal tract.

[+cons]	[-cons]
âm tắc	nguyên âm
âm xát	
âm tắc-xát	bán nguyên âm
âm mũi	
âm bên	[h, ɦ, ʔ]
âm rung	

For [h, ɦ, ʔ] the constriction is in the larynx.

## Major class features

### [±sonorant]

Segments with no build-up of pressure in the vocal tract.

[+son]	[-son]
vowels	stops
glides	fricatives
nasals	affricates
liquids	

[-son] are **obstruents**.

## Major class features

### [±sonorant]

(âm vang)

Segments with no build-up of pressure in the vocal tract.

[+son]	[-son]
nguyên âm	âm tắc
bán nguyên âm	âm xát
âm mũi	âm tắc-xát
âm lỏng	

[-son] are **obstruents** (phụ âm ỏn).

## Major class features

[±syllabic]

Segments which can form a syllable peak.

e.g. Swahili *mbuni* 'ostrich' vs *ṁbuni* 'coffee plant'

[+syll]	[-syll]
vowels	stops
syllabic liquids	fricatives
syllabic nasals	affricates
	liquids
	glides
	nasals

## Major class features

[±syllabic]

Âm đoạn làm đỉnh âm tiết (*âm tiết tính*).

e.g. Swahili *mbuni* 'ostrich' vs *ṁbuni* 'coffee plant'

[+syll]	[-syll]
nguyên âm	âm tắc
âm lỏng	âm sát
tiết tính	âm tắc-xát
âm mũi	âm lỏng
tiết tính	bán nguyên âm
	âm mũi

## Tashlhiyt Berber (Afro-Asiatic, Berber)

ks	🔊	'feed on'
kks	🔊	'take off'
kkstt	🔊	'take it off (fem.)'
tkksttt	🔊	'you took it off (fem.)'
tçtft	🔊	'it dried'
fqq	🔊	'irritate'
ftsxt	🔊	'you cancelled'
sfqqst	🔊	'irritate him'
tftxtstt	🔊	'you dried it (fem.)'
tsskçftstt	🔊	'you dried it (fem.)'

(Carrier phrase *innajas ... jat twalt* 'he told him ... once')

## Major class features

	Vowels	Glides	Syllabic Nas/Liq	Sonorants	Obstruents
	[ a i u ]	[ j w (h) ]	[ ɾ   ṁ ]	[ r l m ]	[ s z p b ]
[syll]	+	-	+	-	-
[son]	+	+	+	+	-
[cons]	-	-	+	+	+

## Russian devoicing

---

How can we characterise the class of segments that devoice?

Plural	Singular	
[ gri <b>b</b> ʷ ]	[ grip ]	'mushroom'
[ sa <b>d</b> ʷ ]	[ sat ]	'garden'
[ ra <b>z</b> ʷ ]	[ ras ]	'time'
[ doma ]	[ dom ]	'house'
[ tsentri ]	[ tsentr ]	'centre'

## Russian devoicing

---

[b d z] = [+cons, -son] (obstruents)

Plural	Singular	
[ gri <b>b</b> ʷ ]	[ grip ]	'mushroom'
[ sa <b>d</b> ʷ ]	[ sat ]	'garden'
[ ra <b>z</b> ʷ ]	[ ras ]	'time'
[ doma ]	[ dom ]	'house'
[ tsentri ]	[ tsentr ]	'centre'

## English (RP)

---

- How can we characterise the class of **consonants** that may occur after [sp, st, sk] in the same syllable?

[ skip ]	[ spɹeɪ ]	[ stju: ]	[ ə'spaɪə ]
[ stɒp ]	[ skju:d ]	[ sklɪə'rʌʊsɪs ]	[ skɹæp ]
[ skwɒd ]	[ spɹeɪn ]	[ spju: ]	[ stɹeɪt ]
[ stæk ]	[ stɹɔ: ]	[ 'splɛndɪd ]	[ skɹɪ ]

## English (RP)

---

[ɹ, l, j, w] = [-syl, +son]

[ skip ]	[ spɹeɪ ]	[ stju: ]	[ ə'spaɪə ]
[ stɒp ]	[ skju:d ]	[ sklɪə'rʌʊsɪs ]	[ skɹæp ]
[ skwɒd ]	[ spɹeɪn ]	[ spju: ]	[ stɹeɪt ]
[ stæk ]	[ stɹɔ: ]	[ 'splɛndɪd ]	[ skɹɪ ]

## English (RP)

[ɹ, l, j, w] = [-syl, +son]  
 ...but \*skn, \*skm?

[skɪp]	[spɹeɪ]	[stju:]	[ə'spaɪə]
[stɒp]	[skju:d]	[sklə'ɹʊʒɪsɪs:]	[skɹæp]
[skwɒd]	[spɹeɪn]	[spju:]	[stɹet]
[stæk]	[stɹɔ:]	['splɛndɪd]	[skl]

## English (RP)

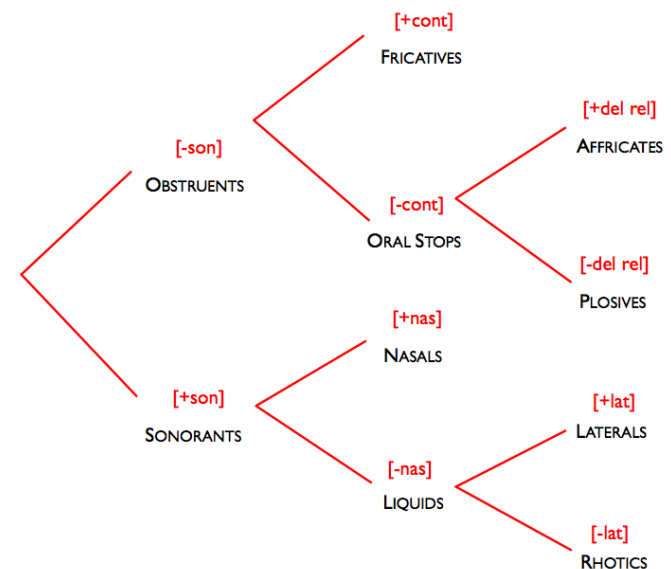

[ɹ, l, j, w] = [-syl, -son]  
 ...but then we incorrectly prohibit <scr-> and <scl->

[skɪp]	[spɹeɪ]	[stju:]	[ə'spaɪə]
[stɒp]	[skju:d]	[sklə'ɹʊʒɪsɪs:]	[skɹæp]
[skwɒd]	[spɹeɪn]	[spju:]	[stɹet]
[stæk]	[stɹɔ:]	['splɛndɪd]	[skl]

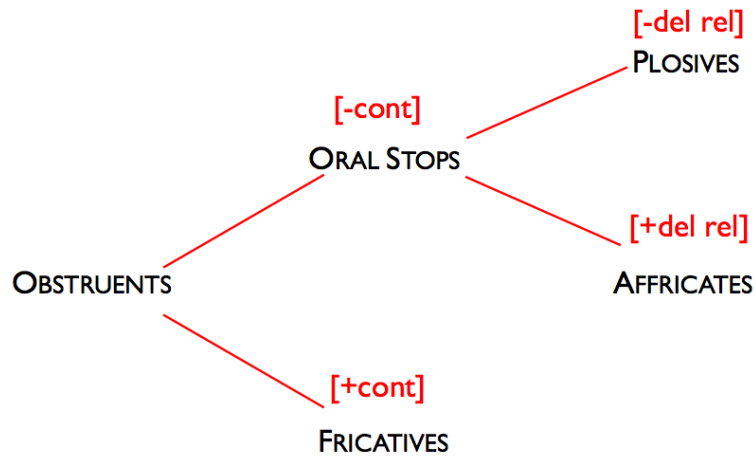

## Distinctive features (*tiêu chí khu biệt*)

- Need a set of features which **distinguish** phonemes.
- We want the smallest set possible...
- ...but one that is also grounded in phonetic reality.

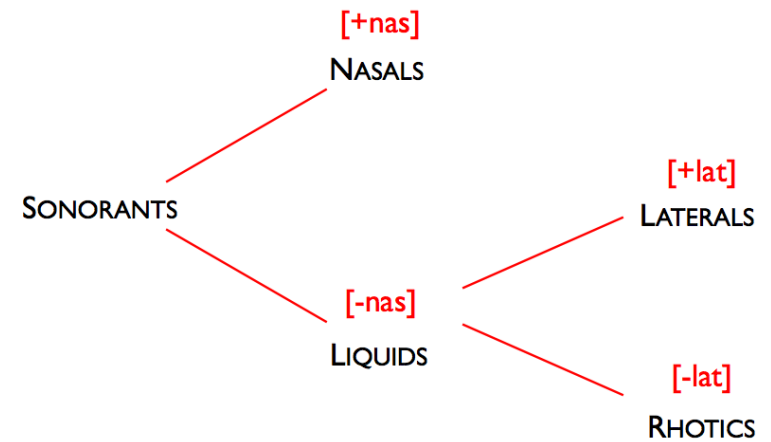

## Manner features

## Manner features

## Manner features

## Manner features

	[p d g]	[s θ v]	[t s d ʒ]	[m n ŋ]	[l ʎ]
[continuant]	-	+	-	-	(+)
[lateral]	-	-	-	-	+
[nasal]	-	-	-	+	-
[delayed rel.]	-	-	+	-	-

## Which sounds match the feature?

[+syll]    w p i m h u g v a

[-cont]    p t ʃ v d z l m k

[-cons]    k l w p j o u g ŋ ʒ

[+son]    a r p q j ŋ b v t ʃ ʎ

## Which sounds match the feature?

[+syll]    w p i m h u g v a

[-cont]    p t ʃ v d z l m k

[-cons]    k l w p j o u g ŋ ʒ

[+son]    a r p q j ŋ b v tʃ ʌ

## Tongue body features

## Tongue body features

	[-back]	[+back]	
[+high]	[i]	[u]	[-low]
[-high]	[e]	[o]	
	[a]	[ɑ]	[+low]
	[+round]	[y u o]	
	[-round]	[i e a]	

## South Kongo (Kikongo)

What conditions the distribution of [t s z] vs. [tʃ ʃ ʒ]?  
 (Chúng ta được miêu tả phân bố của [t s z] vs. [tʃ ʃ ʒ] thế nào?)

- |             |                  |                |             |
|-------------|------------------|----------------|-------------|
| 1. [tobola] | 'to bore a hole' | 9. [nselele]   | 'termite'   |
| 2. [tʃina]  | 'to cut'         | 10. [lolonzi]  | 'to wash'   |
| 3. [kesoka] | 'to be cut'      | 11. [zevo]     | 'then'      |
| 4. [nkoʃi]  | 'lion'           | 12. [ɑzimola]  | 'alms'      |
| 5. [zenga]  | 'to cut'         | 13. [nzwetu]   | 'our house' |
| 6. [zima]   | 'to stretch'     | 14. [kunezulu] | 'to heaven' |
| 7. [kasu]   | 'emaciation'     | 15. [tanu]     | 'five'      |
| 8. [tʃiba]  | 'banana'         |                |             |

## South Kongo (Kikongo)

[tʃ ʃ ʒ] / \_\_\_ [+high, –back] vowels

- |             |                  |                |             |
|-------------|------------------|----------------|-------------|
| 1. [tobola] | 'to bore a hole' | 9. [nselele]   | 'termite'   |
| 2. [tʃina]  | 'to cut'         | 10. [lolonzi]  | 'to wash'   |
| 3. [kesoka] | 'to be cut'      | 11. [zevo]     | 'then'      |
| 4. [nkoʃi]  | 'lion'           | 12. [aʒimola]  | 'alms'      |
| 5. [zenga]  | 'to cut'         | 13. [nzwetu]   | 'our house' |
| 6. [zima]   | 'to stretch'     | 14. [kunezulu] | 'to heaven' |
| 7. [kasu]   | 'emaciation'     | 15. [tanu]     | 'five'      |
| 8. [tʃiba]  | 'banana'         |                |             |

## Other features

- Place of articulation
- Laryngeal state (voicing, glottal constriction)
- Prosody (length, stress)

## Place features

coronal: articulated with the blade of the tongue

[-cor]	[+cor]	[-cor]
--------	--------	--------

bilabial	labio-dental	dental	alveolar	retroflex	post-alveolar	velar
----------	--------------	--------	----------	-----------	---------------	-------

[+ant]	[-ant]
--------	--------

anterior: articulated in the front of the oral cavity

## Classical Arabic

To what class of consonants does [ l ] assimilate?

- |               |              |                 |              |
|---------------|--------------|-----------------|--------------|
| 1. ʔal baab   | 'the door'   | 9. ʔat taxt     | 'the bed'    |
| 2. ʔal faras  | 'the horse'  | 10. ʔad daar    | 'the house'  |
| 3. ʔal kalb   | 'the dog'    | 11. ʔas sanduuq | 'the box'    |
| 4. ʔal xaatam | 'the ring'   | 12. ʔaz zajt    | 'the oil'    |
| 5. ʔal qalb   | 'the heart'  | 13. ʔar razul   | 'the man'    |
| 6. ʔal ʔarb   | 'the war'    | 14. ʔan naas    | 'the people' |
| 7. ʔal ʔab    | 'the father' | 15. ʔaʃ ʃams    | 'the sun'    |

## Classical Arabic

---

To what class of consonants does [ l ] assimilate?

- |               |              |                 |              |

## Features and classes

---

- Every feature specification defines a **class** of segments.
- The generality of the class is **inversely related** to the number of features:
- The more features, the fewer members of the class.

## Specificity and generality

---

[+cons]	[+cons, -son]	[+cons, -son, +voi]	[+cons, -son, +voi, +cor]	[+cons, -son, +voi, +cor, +cont]
p t k b d g f s x v z y m n ŋ l r	p t k b d g f s x v z y	b d g v z y	d z	z

## Summary

---

- We use distinctive features to characterise segments in terms of **natural classes** (*phân loại tự nhiên*)
- Features help us write **short, simple** descriptions
- (Phonological) features are defined in **phonetic** terms.
